Please note that LICH is not responsible (financially or otherwise) for any software customization requested by any HMIS Participating Agency. Should an organization wish to discuss customization of the system/software, or access to additional software modules, LICH shall coordinate these requests with the software provider. Should such customization or module access include an additional cost, this cost would be entirely the responsibility of the HMIS Participating Agency requesting such customization.

LICH will bill each agency monthly based on the number of user logins for that month. An invoice will be sent to each Agency. Payment is due in full upon receipt. It is the Agency’s responsibility to ensure prompt payment.
